

AUSARA

Maintenance Instructions.

Ausara fabric.

Liquid stains won't be absorbed immediately and can be wiped off with a clean sponge or tissue. This has to be done immediately and without rubbing too hard in order not to damage the surface. If the wallcovering gets dusty, it can be vacuum cleaned or cleaned with a special textile sponge.

Non-woven & Metallic wallcovering

Liquid stains won't be absorbed immediately and can be wiped off with a clean sponge or tissue. This has to be done immediately and without rubbing too hard in order not to damage the surface. If the wallcovering gets dusty, it can be vacuum cleaned or cleaned with a special textile sponge.

Textile wallcovering

These are textile wallcoverings with water-based pigment. They are very delicate, stains can be removed if immediately wiped off with a clean and dry tissue or sponge. Hard rubbing should be avoided in order not to damage the fibres. It can be vacuum cleaned.

Natural fibres

These wallcoverings should be handled with greatest care since it is a natural product, printed with waterbased pigments. They are not stain repellent treated. Only vacuum cleaning is allowed. All stains should be avoided.
